

Web Design Intern

An exciting new UX/UI internship at a company that is directly making an impact on the digital future of small businesses across Tanzania.

The company

[Lateral Labs](#) is a digital agency based in Dar-es-Salaam since 2017. We envision a future that is driven by digital technology. Our services include digital strategy, design, operations and product development for small businesses across sectors.

Lateral Labs has worked with hundreds of unique clients in 5+ countries on a range of projects, including brand conceptualization, website design-development, and social media management.

The role

We're now looking for a young, independent, and detail-oriented Web Design Intern for our flagship website services division, [Chapa Link](#). This individual will create website layouts for a wide range of clients and provide design support to our Content and Development teams.

Reporting to: Content Lead

Key skills:

1. Expertise - You have prior UX, UI and general web design experience.
2. Communication - You care about staying in touch with your team to deliver results.
3. Independence - You are able to get things done efficiently without supervision.
4. Time management - You are able to manage your own schedule to meet deadlines.
5. Creativity - You regularly review your own and other work for continuous improvement.

Benefits:

- Fixed-term renewable internship contract of 2 months with pay.
- Flexible hours working from anywhere you can find an Internet connection.
- Room to grow across the Digital services and agency spectrum.

Apply Today

Please share your UX/UI/Web Design portfolio and a 1-page resume to jobs@lateral.co.tz, and we will give you a call if we see an opportunity to work together.
